## SUMMARY

Frontend Generative AI Developer with 1 year of experience in React, Next.js, and TypeScript. Owned and delivered a full product from concept to production at an early-stage startup. Built AI-powered applications using Node.js, OpenAI, LangChain, and vector databases, exploring RAG systems and AI agents.

## EDUCATION

### SRM University

Bachelor of Technology in Computer Science and Engineering - 8.3 CGPA

Delhi, NCR

Aug. 2020 – May 2024

## EXPERIENCE

### Frontend Developer | Clik.ai

Nov. 2024 – Nov. 2025

AI Automated Commercial Real Estate Software

Gurgaon, IND

- Migrated the platform from Webflow to Next.js, **enabling 3x growth** through a scalable architecture.
- Integrated 4+ enterprise APIs** (WordPress, Mailgun, Mixpanel, HubSpot, OpenAI) to automate workflows and synchronize cross-platform data.
- Built **AI chatbot solutions using OpenAI** that reduced support response times and improved self-serve customer engagement.
- Partnered with marketing to implement **technical SEO improvements** and **build high-converting Google Ads landing pages**.
- Managed HubSpot CRM** configuration and data workflows, ensuring clean customer data architecture.
- Owned the complete product lifecycle** as the sole developer, shipping features while maintaining 99%+ uptime.

## PROJECTS

### DevEvent Platform - Event Management | [Live Demo](#)

Sept. 2024 – Oct. 2025

- Tools: Next.js, TypeScript, SSR, MongoDB, Caching*
- Developed a full-stack platform enabling developers to host, discover, and browse community events and hackathons.
- Built event creation workflow with image uploads and event discovery features including search and tag-based recommendations.
- Implemented responsive UI with animations, server-side rendering, and caching for optimal performance.

### NextGen AI - Generative AI | [Live Demo](#)

Oct. 2025 – Present

- Tools: OpenAI, LangChain, LangGraph, Vector DB, AI Agents, AI Voice Agent, RAG*
- Developed an **open-source generative AI repository** with modular, well-documented code for developer learning.
- Implemented LLMs, AI agents, chatbots, RAG pipelines, vector databases, and multimodal AI applications.
- Built self-hosted, production-ready AI models with a focus on security and scalability.
- Created innovative tools including AI Persona Maker, Voice Agent, AI Agents, and Vibe Coder Tool.

## SKILLS

**Frontend:** HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, Shadcn, TypeScript

**Backend:** Node.js, Express.js, MongoDB, REST APIs, Better-Auth, Clerk, Next-Auth, Prisma

**AI & Data:** OpenAI SDK, LangChain, LangGraph, RAG, Vector DB (QdrantDB), AI Agents, Voice Agents

**DevOps & Tools:** Git, GitHub, Figma, AWS, Vercel, Nginx

**Others:** Jira, HubSpot CRM, Webflow, SEO
